PHILOSOPHICAL MAGAZINE B, 1993, VOL. 68, NO. 6, 979–986

SUBJECT INDEX

Vol. 68

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
Aboav's rule in a Voronoi partition	69 L
AgAsS glasses, photo properties of	81 L
Al, f.c.c. thallium inclusions in	131 L
Al, nanocrystalline	967 B
Al doped Si, twin boundary in	951 A
AlCoCu quasicrystal	225 L
AlCoNi quasicrystal, dislocations in	1033 A
AlCoTi alloy, microstructure of	517 A
$Al_{62}Cu_{20}Co_{15}Si_3$ quasicrystals, structure of	39 L
$Al_{75}Cu_{10}Cr_{15}$, twinning in	389 B
AlCuFe, icosahedral, dislocations in	273, 279 L
AlCu(Ru, Fe) quasicrystals, structure of	475 B
AlFeCu, transformations in	595 B
AlGaAs, donor states in	727 B
AlGe, structure of	513 B
Alkali halides, H centre migration in	1359 A
Alloy phases for binary hard-disc mixtures	85 B
AlMnPd, decagonal approximant of	697 B
AlMnPd quasicrystals, growth of	487 B
Al_2O_3, stacking-fault energies in	171 B
AlPdMg quasicrystals	123 L
AlPdMn phase diagram	607 B
AlPdMn quasicrystals, diffusion in	315 L
Al_3Ti alloys, dislocation dissociation in	81 A
Amorphization of NiZr diffusion couples	891 B
Amorphization of PdSi	833 B
Amorphous alloys, crystal growth from	813 B
Amorphous Si, transport in	203 B
Amorphous Si:H, oxidation of	29 B
Amorphous silicon, electrons and holes in	265 L
Amorphous silicon, hopping in	341 L
Amorphous systems, conductivity in	285 B
Amorphous $TbFe_2$ hydrides	883 B
Anderson transition, properties of	357 B
Antimonate electrolytes, Al in	787 B
Antimony doped tin oxide films	215 B
Antiphase boundaries in TiAl	13 L
Ar ion milling of II–VI semiconductors	1 L
AsS glasses, Raman studies of	551 B
Barrier films in antimonate electrolytes	787 B
Binary hard-disc mixtures	85 B
Binary ordered alloy, diffusion in	831 A
Binary ordered alloys, impurities in	677 B
Bipolaron model of high T_c superconductors	247 L
Bismuth oxide, thermopower in	787 A

	PAGE
$Bi_2Sr_2CaCu_2O_x$ superconductors	117 L
Bleaching of amorphous GeSe	73 L
BN films, microdiffraction of	939 B
Boron, diffusion of in Fe	99 L
C and N precipitates in TiAl	965 A
Cadmium sulphide deposited from ammonia	185 B
CaO, VO, and NiO, *ab initio* calculations of	653 A
Carbon films, diamond-like	167 L
Cavitation of glassy polymers	537 A
Cd and Co, dislocation relaxation in	1315 A
Cellular dislocations	1183 A
Cellular patterns, growth in	363 L
Ceramic interfaces, heteroepitaxial	565 A
Ceramics, damage in	1003 A
Ceramics, stresses in	35 A
$(Ce, U)Al_2$ alloys, studies of	653 B
Chalcogenide glasses, photo properties of	689 B
Chalcogenide glasses, photostructural changes in	561 B
Charge density in intermetallics	455 B
Charge density in TiAl	29 L
Chromium, electron charge distribution of	275 B
Chromium carbides, structure of	619 B
Clustered vacancy defects, formation of	843 A
Clusters, copper, simulations of.	903 B
Co and Cd, dislocation relaxation in	1315 A
CoAg, preparation of	923 B
Coarsening cellular patterns, growth in	363 L
$Co_{48}Ga_{52}$, point defect elimination in	53 L
Coherent electron nanodiffraction	1055 A
Conductivity in amorphous systems	285 B
CoO, Ga-doped, defects in	747 A
Copper, deformation banding in	185 L
Copper, twist boundaries in	939 A
Copper clusters, simulation of	903 B
Copper oxide superconductors, resistivity of	245 L
Corundum, defect energies for	695 A
$CoSi_2$ on Si, properties of	413 B
CoSi/Si epitaxial system, defects in	1131, 1345 A
CoZr and CoHf, slip and dislocations in	401 A
Crack growth in SiN.	283 L
Crack networks in thin films	63 L
CrC, metastable, structures of	619 B
Creep, high-temperature, dislocations in	113 A
Creep in AlCoCu quasicrystal	225 L
CrFe, spin glass and ferromagnetic phases of	539 B
Crystal growth from amorphous alloys	813 B
Cu alloys, nanocrystalline	825 B
CuBe, solute segregation in	1045 A
Cube dislocations in Fe_3Ge	977 A
CuCo, decomposition kinetics of	1195 A
CuCo f.c.c. metastable phase	957 B
CuFeCo bicrystals, grain boundaries in	137 A
CuPd, electrical resistivity in	137 L
Damage in ceramics	1003 A
Damping of dislocations at low frequencies	865 A
Decagonal $Al_{75}Cu_{10}Cr_{15}$, twinning in	389 B

PAGE

Decagonal approximant of AlMnPd . . . . . 697 B
Decomposition kinetics of CuCo . . . . . 1195 A
Defect creation in Si:H . . . . . 159 L
Defect energies for pure and doped corundum . . . . . 695 A
Defect scattering in crystals . . . . . 1 B
Defect structures in TiC . . . . . 325 A
Defects, fast electron diffraction of . . . . . 453 A
Defects in CoSi/Si epitaxial system . . . . . 1331, 1345 A
Defects in nanocrystalline PdH . . . . . 335 L
Defects in strained SiGe layers on Si . . . . . 59 A
Defects in TiAlNbMn . . . . . 289 L
Defects in transition metal oxides . . . . . 767 A
Deformation, dislocation stress fields for . . . . . 599 A
Deformation banding in copper . . . . . 185 L
Deformation of ferromagnetic materials . . . . . 1233 A
Deformation twinning in refractory alloys . . . . . 419 A
Deformation twinning in TiAlMnNb . . . . . 915 A
Deformation twins in TiAl . . . . . 471, 495 A
Deformed FeCo, order in . . . . . 327 L
Diamond, optical absorption of . . . . . 39 B
Diamond-like carbon films . . . . . 167 L
Diffusion controlled phase transitions . . . . . 891 A
Diffusion in a random alloy . . . . . 819 A
Diffusion in binary ordered alloys . . . . . 831 A
Diffusion of isotopes in oxide surfaces . . . . . 809 A
Diffusion of Mn in AlPdMn . . . . . 315 L
Disclination stresses in inhomogeneous media . . . . . 1215 A
Dislocation arrays, disordered stress in . . . . . 297 L
Dislocation configuration in TiAl . . . . . 237, 259 A
Dislocation damping at low frequencies . . . . . 865 A
Dislocation dissociation in Al_3Ti . . . . . 81 A
Dislocation drag in thin metals . . . . . 381 B
Dislocation loops in TiAlV alloys . . . . . 183 A
Dislocation mobility in ZnS . . . . . 97 A
Dislocation slip and intergranular sliding . . . . . 207 L
Dislocation stress fields for deformations . . . . . 599 A
Dislocations in AlCoTi . . . . . 517 A
Dislocations in GeSi/Si interfaces . . . . . 1251 A
Dislocations in high-temperature creep . . . . . 113 A
Dislocations in icosahedral AlCuFe . . . . . 273, 279 L
Dislocations in $MoSi_2$ . . . . . 1295 A
Dislocations in quasicrystals . . . . . 321 L
Dislocations in TiAl subboundaries . . . . . 21 L
Dislocations in YBCO . . . . . 19 A
Disordered CuPd, electrical properties of . . . . . 137 L
Disordered systems, hopping conductivity in . . . . . 47 B
Dispersive hopping transport, model of . . . . . 425 B
Dispersoids in oxide strengthened materials . . . . . 367 A
Displacement cascades in metals . . . . . 1165 A
Domain boundaries in Ni_3Ga . . . . . 107 L
Domain size modelling in YBCO . . . . . 17 B
Donor states in AlGaAs . . . . . 727 B

Edge dislocations in InGaAs heterostructures . . . . . 1273 A
Edge dislocations near inhomogeneities . . . . . 49 A
Elastic constants of KBr . . . . . 663 B
Elastic properties of MnNi . . . . . 437 B
Elastic properties of polycrystals . . . . . 575 A

	PAGE
Electroluminescence in ZnS:Mn	573 B
Electron charge distribution of Cr	275 B
Elliptic inhomogeneities, dislocations near	49 A
Evolution of grains in two-phase systems	1091 A
Fast electron diffraction of defects	453 A
Fault energies in Ni_3Al	305 A
Fe, diffusion of boron in	99 L
FeB, nucleation and growth in	869 B
FeCo, deformed, order in	327 L
FeCu, plastic deformation of	877 B
FeCuNbSiB, nanocrystalline	853, 861 B
Fe_2(Dy, Tb) Laves phase, plasticity of	871 A
Fe_3Ge, cube dislocations in	977 A
Ferromagnetic materials, deformation of	1233 A
Ferromagnetic nanocrystalline FeCuNbSiB	853, 861 B
Fibre-push-out test, friction and stress in	5 L
Fluorides, metal, self-development in	227 A
Fractal description of martensitics	885 A
Friction and stress in fibre-push-out test	5 L
Ga-doped CoO, defects in	747 A
GeSe, amorphous, bleaching of	73 L
GeSi/Si interfaces, dislocations in	1251 A
GeSnSeCu, photodarkening in	529 B
Glassy AgAsS, photo properties of	81 L
Glassy AsS, Raman studies of	551 B
Glassy chalcogenides, photo properties of	689 B
Glassy GeSnSeCu films	529 B
Grain boundary in NiAl	1151 A
Grain boundary precipitates in CuFeCo	137 A
Grain boundary sliding	1183 A
Grain boundary sliding in PbSn	201 L
Grain boundaries in NiBe	1039 A
Grain evolution in two-phase systems	1091 A
Grain growth, 2D, motion of vertices in	93 L
Grey–white tin interface	237 L
H centre migration in alkali halides	1359 A
Haematite, point defects in	725 A
Heavy-ion irradiation, planar defects from	1079 A
Helium bubble growth in Pd	257 L
Heteroepitaxial ceramic interfaces	565 A
$HgBa_2CaCu_2O_{6+\delta}$, superconductivity in	345 L
Hopping conduction in R-percolation	639 B
Hopping conductivity in disordered systems	47 B
Hopping transport, dispersive, model of	425 B
Hydrogenated silicon–carbon alloys	329 B
Icosahedral AlFeCu, phases in	595 B
Icosahedral AlMnPd, growth of	487 B
Imaging of surfaces in keV range	179 L
Indium, magnetoacoustic oscillations in	291 B
InGaAs and InP, ultra-thin buried layers in	121 A
InGaAs heterostructures, dislocations in	1273 A
InP and InGaAs, ultra-thin buried layers in	121 A
Interface melting in Pb embedded in Zn	215 L
Interface properties in SiH/SiCH multilayers	737 B

PAGE

Interfacial misfit, O-lattice analysis of . . . . . 279, 291 A
Intergranular sliding and dislocation slip . . . . . 207 L
Intermediate states in quasicrystals . . . . . 317 B
Intermetallics, charge density in . . . . . 455 B
Ion bombardment, surface reconstruction by . . . . . 231 B
Ionic hopping in solid electrolytes . . . . . 711 A
Ionic fluids in microporous ionic matrices . . . . . 357 L
Isothermal averaging in electrical transport . . . . . 7 B
Isotope effect in binary ordered alloys . . . . . 677 B

KBr, elastic constants of . . . . . 663 B
KTe, liquid, electrical properties of . . . . . 85 L

Lanthanum sulphide, structure of . . . . . 67 B
Liquid KTe, electrical properties of . . . . . 85 L
Lithium intercalation in metal oxides . . . . . 667 A
Loop formation in Ni . . . . . 381 A

Magnetic dipole in a superconductor . . . . . 713 B
Magnetism of UCu_2Ge_2 . . . . . 195 B
Magnetoacoustic oscillations in indium . . . . . 291 B
Magnetoresistance of CoSi . . . . . 923 B
Magnetostriction, theory of . . . . . 237 B
Martensitic NiAl, microtwins in . . . . . 1017 A
Martensitics, fractal description of . . . . . 885 A
Mechanical alloying of CuCo . . . . . 957 B
Metal oxides, lithium intercalation in . . . . . 667 A
Metal oxides, perovskite related . . . . . 641 A
Metallic melts, undercooled, viscosity of . . . . . 897 B
Metals, displacement cascades in . . . . . 1165 A
Metastable AlGe, structure of . . . . . 513 B
MgO, secondary-electron emission from . . . . . 145 L
Microporous ionic matrix for ionic fluids . . . . . 357 L
Misfit dislocations in SiGe layers . . . . . 357 L
Misfit dislocations in superalloys . . . . . 193 A
MnNi, antiferromagnetic, elasticity of . . . . . 437 B
MnO, VO, CaO, and NiO, *ab initio* calculations of . . . . . 653 A
Mobility in SiC:H with low C . . . . . 173 L
Molecular dynamics study of polyacetylene . . . . . 397 B
$MoSi_2$, dislocations in . . . . . 1295 A

$NaCuCO_2$, X-ray photoemission of . . . . . 153 L
Nanocrystalline Cu alloys . . . . . 825 B
Nanocrystal structure of FeCu . . . . . 877 B
Nanodiffraction, coherent electron . . . . . 1055 A
Ni, loop formation in . . . . . 381 A
Ni based superalloys, channels in . . . . . 1129 A
Ni_3Al, fault energies in . . . . . 305 A
NiAl, grain boundary in . . . . . 1151 A
NiAl, phase stability of . . . . . 845 B
Ni_3Al, screw dislocations in . . . . . 1097 A
NiAl martensite, microtwins in . . . . . 1017 A
$Ni_3(Al, Ti)$, superlattice dislocations in . . . . . 993 A
Ni_3Ga, domain boundaries in . . . . . 107 L
NiBe, grain boundaries in . . . . . 1039 A
NiO, CaO, VO and MnO, *ab initio* calculations of . . . . . 653 A
$NiSi_2$, twin boundary structures in . . . . . 151 A
$NiSi_2$/Si interfaces, atomic structure of . . . . . 605 A

	PAGE
NiTi, microstructure and properties of	349 A
Nitride films, microdiffraction of	939 B
Nitrogen doped a-SiC:H films	55 B
NiZr diffusion couples	891 B
Non-Fermi liquids, instabilities in	251 L
Non-stoichiometric Ta_2O_5-type oxides	633 A
Nucleation and growth in amorphous FeB	869 B
Nucleation models of recrystallization	115 B
O-lattice analyses of interfacial misfit	279, 291 A
Ordering in amorphous PdNiP	913 B
Oxide strengthened materials, dispersoids in	367 A
Oxide surfaces, diffusion of isotopes in	809 A
Oxide surfaces at finite temperature	799 A
Oxides of Ti and V, nanophases of	949 B
Oxygen in YBCO, microscopy of	1 A
Pb embedded in Zn	215 L
PbSn, grain-boundary sliding in	201 L
Pd, helium bubble growth in	257 L
PdH, nanocrystalline, defects in	335 L
PdNiP, amorphous, relaxation in	913 B
PdSi, amorphization of	833 B
Perovskite related metal oxides	641 A
Phase stability of NiAl	845 B
Phase transitions, diffusion controlled	891 A
Photoemission study of $NaCuO_2$	153 L
Photostructural changes in a-chalcogenides	561 B
Planar defects from heavy-ion irradiation	1079 A
Planar defects in TiAl	169 A
Plastic deformation in polyethylene	209 A
Plastic deformation of spherical bodies	191 L
Plastic damage in SiC single crystals	45 L
Plasticity of Fe_2(Dy, Tb) Laves phase	871 A
Platinum, specific heat in	223 B
Point defect elimination in $Co_{48}Ga_{52}$	53 L
Point defects in haematite	725 A
Polyacetylene, molecular dynamics in	397 B
Polycarbonate, terthiophene-doped, hopping in	753 B
Polycrystals, elastic properties of	575 A
Polyethylene, plastic deformation in	209 A
Polymers, glassy, cavitation of	537 A
Porous Si, structure of	353 L
Pulsed laser deposition of $CoSi_2$ on Si	413 B
Quasicrystal AlPdMg system	123 L
Quasicrystalline AlCoNi, dislocations in	1033 A
Quasicrystalline $Al_{62}Cu_{20}Co_{15}Si_3$, structure of	39 L
Quasicrystalline AlCu(Ru, Fe), structure of	475 B
Quasicrystalline AlPdMn phases	607 B
Quasicrystals, dislocations in	321 L
Quasicrystals, intermediate states in	317 B
Random alloy, diffusion in	819 A
Rare gas crystals, thermal conductivity of	767 B
Recrystallization, nucleation models of	115 B
Refractory alloys, deformation twinning in	419 A
R-percolation, hopping in	639 B
Rutile, twin boundaries in	309 L

PAGE

Scattering by defects in crystals . . . . . 1 B
Screw dislocations in Ni_3Al . . . . . 1097 A
Secondary electron emission from MgO . . . . . 145 L
Self-developing processes in metal fluorides . . . . . 227 A
Semiconductors, II–VI, Ar ion milling of . . . . . 1 L
Shear stresses in toughened ceramics . . . . . 35 A
Si, Al doped, twin boundary in . . . . . 951 A
Si, amorphous, transport in . . . . . 203 B
Si, Ge and Sn, diffusion of, in Ti . . . . . 901 A
Si, porous, structure of . . . . . 353 L
Si:H, amorphous, oxidation of . . . . . 29 B
Si:H, defect creation in . . . . . 159 L
SiC, plastic damage in . . . . . 45 L
SiC:H, amorphous and crystalline, IR of . . . . . 329 B
SiC:H, electron drift mobility in . . . . . 173 L
SiC:H doped films, photoconductivity of . . . . . 55 B
SiGe layers, misfit dislocations in . . . . . 195 L
SiGe layers on Si, defects in . . . . . 59 A
SiH/SiCH multilayers, properties of . . . . . 737 B
Silicon, amorphous, electrons and holes in . . . . . 265 L
Silicon, amorphous, hopping in . . . . . 341 B
SiN, subcritical crack growth in . . . . . 283 L
Slip and dislocations in CoZr and CoHf . . . . . 401 A
Solid electrolytes, ionic hopping in . . . . . 711 A
Solute segregation in Cu–Be . . . . . 1045 A
Specific heat in platinum . . . . . 223 B
Spherical bodies, plastic deformation of . . . . . 191 L
Spin glass and ferromagnetic phases of CrFe . . . . . 539 B
Spinodal decomposition in zirconia–yttria . . . . . 305 B
$SrTiO_3$ substrate for superconductor growth . . . . . 117 L
Stacking-fault energies in Al_2O_3 . . . . . 171 B
Stress fields in dislocation arrays . . . . . 297 L
Superalloys, Ni based, channels in . . . . . 1129 A
Superalloys, two phase, dislocations in . . . . . 193 A
Superconductivity, high T_c, bipolaron model of . . . . . 247 L
Superconductivity in $HgBa_2CaCu_2O_{6+\delta}$ . . . . . 345 L
Superconductivity in ZrCe . . . . . 231 L
Superconductor, magnetic dipole in . . . . . 713 B
Superconductor instability in non-Fermi liquids . . . . . 251 L
Superconductors, copper oxide, resistivity of . . . . . 245 L
Superlattice dislocations in $Ni_3(Al, Ti)$ . . . . . 993 A
Superlattices in weak beam microscopy . . . . . 525 A
Surface reconstruction by ion bombardment . . . . . 231 B
Surfaces, imaging of in keV range . . . . . 179 L

Ta_2O_5 structure, oxides with . . . . . 633 A
TbDyFe, magnetostriction in . . . . . 237 B
$TbFe_2$ hydrides, magnetic properties of . . . . . 883 B
Terthiophene-doped polycarbonates . . . . . 753 B
Tessellation, Voronoi, 2D . . . . . 149 B
Thallium, f.c.c., in Al . . . . . 131 L
Thermal conductivity of rare gas crystals . . . . . 767 B
Thin films, crack networks in . . . . . 63 L
Thin metals, dislocation drag in . . . . . 381 B
Ti, Si, Ge, Sn diffusion in . . . . . 901 A
TiAl, antiphase boundaries in . . . . . 13 L
TiAl, C and N precipitates in . . . . . 965 A
TiAl, charge density in . . . . . 29 L

	PAGE
TiAl, deformation twins in	471, 495 A
TiAl, planar defects in	169 A
TiAl alloys, dislocation configuration in	237, 259 A
TiAl subboundaries, dislocations in	21 L
TiAlMnNb, deformation twinning in	915 A
TiAlNbMn, defect analysis in	289 L
TiAlV alloys, dislocation loops in	183 A
TiC, defect structures in	325 A
Tin, grey–white interface	237 L
Tin oxide doped with antimony	215 B
Titanium films, twins in	587 A
Transition metal oxides, defects in	767 A
Transition metal oxides, intercalation in	677 A
Transport at low and high fields	7 B
Twin boundary structures in $NiSi_2$	151 A
Twin boundaries in rutile	309 L
Twins in titanium thin films	587 A
Twist boundaries in copper bicrystals	939 A
UCu_2Ge_2, magnetism of	195 B
Uranium oxides, intercalation in	677 A
Vacancy defects, clustered, formation of	843 A
Vertices, motion of in 2D grain growth	93 L
Viscosity of undercooled metallic melts	897 B
VO, CaO, MnO and NiO, *ab initio* calculations of	653 A
Voronoi partition, Aboav's rule in	69 L
Voronoi tessellation, 2D	149 B
VTi oxide particles, nanophase	949 B
Weak beam microscopy, superlattices in	525 A
Wedge disclination stresses	1215 A
YBCO, dislocations in	19 A
YBCO, domain size modelling in	17 B
YBCO on MgO, microscopy of	1 A
Zirconia–yttria, spinodal decomposition in	305 B
ZnS, dislocation mobility in	97 A
ZnS:Mn, conduction in	465 B
ZnS:Mn electroluminescence in	573 B
ZrCe, superconductivity in	231 L
